

For Immediate Release
July 14, 2016

MORRISTOWN- This severe weather event has resulted in numerous trees and powerlines down throughout Morristown. Many of these power lines are still live and can be dangerous. JCP&L and emergency crews have been notified and are working on the condition however, due to the number of issues, there is no estimate of the time until this is fully resolved. Public safety crews are dealing with issues of safety first and will be available to take reports of damage once that task has been completed.

In the meantime, residents are requested to avoid driving throughout Morristown unless completely necessary. Those residents walking are asked to use caution as tree branches may come loose.

Anyone encountering downed power lines should assume they are live and stay away to prevent serious injury or death.

Residents with emergencies should contact 911 for assistance. Residents wishing to report damage should contact Morristown Police at 973-538-2200 or Morris Township Police at 973-539-0777. JCP&L can be contacted at 800-662-3115.
